1	Client's Reminder for presentation.	The team should be arranging how the presentation should be.	Each team member will work on specific parts of the presentation slide. The system demo will be in the form of a video.	All members
2	Product testing.	The testing documents are optional, but the team will get better marks if it's made. The backend team consulted about what to put in the testing files. The client suggested that the backend uses either **codeception** or **coderwall** for Laravel testing.	The backend is considering using the suggested tools for testing. The frontend will use the acceptance testing, following the last semester's testing format.	All members
